MondoNovo Electronics

MondoNovo Electronics is a start-up company founded in 2015 with the aim of developing innovative products for the outdoor and professional market through technology transfer processes.

The company is able to follow with efficiency and speed the entire design and production process and offers technical and commercial consulting for the manufacturing industry (automation, energy retrofit, implementation of machine vision systems, sensors for quality control) and for the printing sector (printing consumables, spare parts, microchips).

It recently joined a partnership with **Halley Informatica** and **Vision Device,** two well established leading companies in software development applications using machine vision systems for industry and automation.

OUR STANDARD APPLICATIONS

RA.ZE: 3D automatic machine vision system for robots (Bin Picking)

WEBCHECK: continuous 100% surface inspection for detection of production anomalies (plastic films, paper, non-woven fabrics, fabrics, glass, sheet metal, etc.)

PRINTCHECK: system for the detection and control of printing defects

DIAPERCHECK: system for the control of the production cycle of diapers and sanitary pads

LINCEOONE: flexible and configurable, designed for the different needs of industrial applications

CODEVISION: designed for the verification of alphanumeric characters, bar-codes and two-dimensional codes

DATO VARIABILE (VARIABLE DATA): the system for controlling printing with variable data (Barcode, Id, Tax Codes, Serial Numbers, etc.)

ALIGNVISION: system for checking and matching plaid and striped fabrics
